

Tyrus Capital Alternatives LLP, formerly Tyndaris LLP, Pillar 3 Disclosure

Disclosure Policy

The Capital Requirements Directive (“CRD”) is the framework for implementing Basel II in the European Union. Basel II implements a risk sensitive framework for the calculation of regulatory capital. This was implemented in the United Kingdom through changes to the Financial Conduct Authority (“FCA”) Handbook of Rules and Guidance, and specifically through the creation of the General Prudential Sourcebook (“GENPRU”) and the Prudential Sourcebook for Banks, Building Societies and Investment Firms (“BIPRU”), specifically BIPRU 11.

The framework consists of three pillars:

- Pillar 1 – sets out the minimum capital requirements for the investment manager;
- Pillar 2 – deals with the Internal Capital Adequacy Assessment Process (“ICAAP”) undertaken by the Firm to assess the adequacy of capital held in relation to its material risks; and
- Pillar 3 – requires the Firm to publicly disclose its policies on risk management, capital resources and capital requirements.

The Pillar 3 disclosure of Tyrus Capital Alternatives LLP, formerly Tyndaris LLP (“Tyrus Capital” or the “Firm”) is set out below. The regulatory aim of the disclosure is to improve market discipline and transparency.

Tyrus Capital makes Pillar 3 disclosures annually. The information contained in this disclosure is accurate as at 31 May 2020. This document has not been audited by Tyrus Capital’s external auditors and does not constitute any form of financial statement.

Certain information relating to BIPRU 11.5 may be omitted on the basis that it has been deemed to be immaterial or proprietary/confidential. The Firm regards information as material in the disclosure if its omission or misstatement could change or influence the assessment or decision of a user relying on that information for the purpose of making economic decisions. The Firm regards information as proprietary/confidential if sharing that information with the public would undermine its competitive position. Proprietary/confidential information may include information on products or systems which, if shared with competitors, would render the Firm’s investments therein less valuable. Further, the Firm must regard information as confidential if there are obligations to customers or other counterparty relationships binding the Firm to confidentiality.

Background to the Firm

The Firm is authorised and regulated by the FCA and as such is subject to minimum regulatory capital requirements. The Firm is categorised by the FCA, for capital purposes, as a BIPRU firm. It is an investment management firm and has no trading book exposures. The Firm is not required to prepare consolidated reporting for prudential purposes.

Capital Resources Requirement

Pillar 1 - Minimum Capital Requirements

As a BIPRU firm, Tyrus Capital has adopted the standardised approach for the Pillar 1 regulatory capital calculation of credit risk. Tyrus Capital does not deal as principal and holds no commodity or securitisation positions.

For the Pillar 1 regulatory capital calculation of market risk the Firm calculates its Foreign Currency Position Risk Requirement by multiplying the sum of the absolute values of its 'open currency position' by 8%.

The Pillar 1 capital requirement for a BIPRU firm is calculated as the higher of the:

- Fixed Overheads Requirement ("FOR"); and
- the sum of market and credit risk requirements; or
- the base capital requirement of €50,000.

The Firm has deemed the FOR to be the higher and this is therefore used for the Pillar 1 calculation.

Pillar 2 – ICAAP

The Firm's ICAAP includes an assessment of the design and performance of the internal controls in place to mitigate risks, the probability of the risk occurring, the potential financial and reputational impact, and the adequacy of the Firm's capital base.

The ICAAP is the process through which Tyrus Capital determines that it is able to identify and manage its key risks on an on-going basis and ensure that it has sufficient capital in respect of such risks. The process is forward looking and is an integral part of the management of the Firm. The Firm's Compliance Officer, who is also the Managing Director of the Firm (defined within this document as "MD") is responsible for the ICAAP within Tyrus Capital and consulted with all relevant stakeholders to ensure the accuracy of the findings.

The MD formally reviews and approves a finalised ICAAP document on at least an annual basis (or more frequently if there are material changes to the Firm's business model and risk exposures). The Firm's MD, as part of the ICAAP review, sets the Firm's risk appetite, validates that the Firm's key material risks have been considered and assessed, and validates the stress testing scenarios.

Capital Resources

The main features of the Firm's Capital Resources as at 31/12/2019 are as follows:

Capital Item	£'000s
Tier 1 capital less innovative tier 1 capital	1,906
Tier 2 capital	0
Tier 3 capital	0
Total capital resources, net of deductions	1,022

The above information is based on the latest set of financial statements filed with Companies House.

Risk Management Objectives and Policies

Due to the nature, size and complexity of the Firm, Tyrus Capital does not have an independent risk management function. The Firm's MD is responsible for oversight of the management of risk within the Firm. Tyrus Capital has clearly documented policies and procedures (contained in the Firm's Compliance Policies and Procedures Manual), which are designed to minimise risks to the Firm and all staff are required to confirm that they have read and understood them.

Tyrus Capital will undertake an ICAAP at least annually and when any significant changes to the business or its operating environment occur. It is the process through which the Firm identifies and manages its key risks on an on-going basis. The process is forward looking and is an integral part of the management of the Firm.

In reviewing the key risks the Firm considers whether it is necessary to allocate additional capital, as set out in Appendix 1 ICAAP.

Following the completion of the ICAAP, the Firm has concluded that its Tier 1 capital is sufficient to cover its Pillar 1 and Pillar 2 requirements.

Remuneration

Tyrus Capital must comply with the BIPRU Remuneration Code (the "Code"). The purpose of the Code is to ensure that firms have risk focused remuneration policies, which are consistent with and promote effective risk management and do not expose themselves to excessive risk. The Firm has reviewed all existing employment contracts to ensure they comply with the Code.

The Firm's MD is responsible for setting the Remuneration Policy Statement for all staff. No external consultants have been engaged on remuneration matters.

The Code can be applied in a proportionate way and the FCA have stated that it will normally be appropriate to disapply certain rules. As such the Firm's MD has determined that the following rules are not proportionate to Tyrus Capital and have not implemented these detailed rules:

- SYSC 19C.3.44 – Ratios between fixed and variable components of total remuneration;
- SYSC 19C.3.47 – Retained shares or other instruments;
- SYSC 19C.3.49 – Deferral; and
- SYSC 19C.3.51 – Performance adjustment

Variable remuneration is not based solely on the financial performance of the individual. The Firm's MD also considered the individuals' overall (non-financial) performance to the whole team and the overall results of the Firm and the relevant fund being managed/advised. The performance of the individual is assessed over the entire year.

Quantitative Information

The following business areas received the following aggregate amount of remuneration:

Business Line	£'000
Investment advisory & management	2,647

Remuneration for senior management and risk takers during 2019 was as follows:

Senior Management & Risk Takers	£'000
Total remuneration for the year	4,445
